

Zeiss Contura G2 3D scanning machine

EXCELLENCE IN SPEED, QUALITY & PRICING

Our leading-edge metrology lab specializes in all-dimensional First Article Inspections.

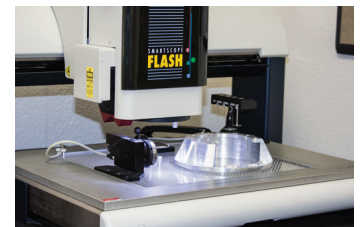

Expert metrology services from the developer of the award-winning NuVinci[®] continuously variable planetary technology.

WHY CHOOSE US?

- Often 10 business day lead times (expediting available) and attractive pricing.
- Highly skilled staff with 30+ years of experience using top quality equipment.
- ASME Y14.5-1994 and 2009 GD&T certified technicians with extensive ISO GPS experience dedicated to engineering drawing interpretation and consultation.

Exceptional metrology equipment includes:

- Zeiss Contura G2 CMM
- Mahr XCR-20 Contour & Surface Roughness
- Mahr Formtester MMQ 400
- Starrett Rockwell Scale Hardness Tester
- OGP SmartScope 500

Fallbrook offers the same outstanding quality and valuable machining and metrology services that we deliver to our technology licensees, including Allison Transmission, Dana Corporation and other automotive suppliers.

"It's impressive what your Metrology lab has been able to do for our company and for our technology." - Customer testimonial
